About Van Moer

The worldwide reference for quality in corporate apparel.

Van Moer was founded in 1922 in Mechelen. Thanks to vision and hard work, in 1998 Van Moer expanded in the Netherlands. Since then, Van Moer profiles itself as the reference for work- and industrial clothing in Western Europe. Today Van Moer counts about one hundred employees in Belgium and the Netherlands.

An office with everything under one roof

Our Belgian headquarters in Hulshout offers everything under one roof. In this 9,500 m² warehouse, we centralize sales and distribution to our customers. Need for functional clothing with PPE (personal protective equipment) or a collection of industry+, cleanroom or food? We discuss the fundamentals here at our headquarters. Styling, research & development of new samples and products for our customized workwear also take place in Hulshout.

Not from our garment workshop but from our years of knowledge and presence in the healthcare market, we also give clothing for hospitals (cure), institutions (care) and Ok's a powerful fitting and appearance: from the employees at the reception (hospitality) or the hospital restaurant (food & catering) to the maintenance staff and surgeons in the OR. Thanks to our in-depth knowledge, we know perfectly which requirements and standards this healthcare clothing must meet.

Our products

Your employees will shine every day in the corporate clothing we have designed with you. This totally contributes to your positive corporate image. We have a wide assortment and will guide you to a fitted clothing line. Together, we go for nothing less than Fitted to Perfection. In the exciting process of arriving at the new clothing line, we also advise you to minimize your ecological footprint. How do we do that? An extensive network of resources ensures that you will be amazed by our pioneering role. We ensure that your team combines sustainability with an attractive appearance and comfortable workwear. Meet all the strengths of our standard collections or a unique concept based on your expectations.

Tailor-made corporate clothing

Our expertise ensures that we can provide every employee with comfortable-feeling work clothing. A wide range of sizes ensures that everyone can start the new working day comfortably. We gladly take you along and guide you in order to meet your expectations as a customer. Does the risk analysis show that we need to provide your employees with standardized workwear? We accept this challenge with great ambition and develop a new clothing line with you. This new comfortable clothing line will become your company's business card that your employees will be proud to wear!

Standard collections

Precise and refreshing, that's what our standard collections stand for. A surprising design with a balanced mix of using a stretch or a circular fabric? Confection is in our DNA! Discover our wide range of collections such as Healthcare, Cleanroom, Protective Workwear and more.

Corporate clothing for various industries

A cooperation with Van Moer stands for trust, durability, innovation and a personal approach. An optimal total service, that is what we ultimately go for. So we don't start designing without first thinking carefully about the wishes and needs of each company.

From off-the-shelf basic pieces to fully customized: thanks to more than 100 years of experience, we have made our mark in custom workwear in the professional world of distributors, industrial laundries government agencies, large industrial companies and retail.

Workwear

Equip your employees with the personalized clothing of Van Moer. Thanks to our extensive product portfolio we make sure that every employee starts his working day with a safe and functional work outfit. Let our knowledge advise you and choose for comfortable work clothing that fits snugly.

Pants, vests, dust jackets, overalls or suspenders? Discover a selection of workwear based on every wearer's needs, despite company size or industry. Our materials are available in a variety of colors and basic qualities. From polyester/cotton, cotton/polyester, to inherent fabrics - we are happy to listen to your needs and guide you to a comfortable fulfillment of your expectations! An absolutely innovative combination of comfort and safety.

Protective workwear

At Van Moer, it is a basic requirement that work and safety clothing fits perfectly and wears comfortably. Only this way your employees can give the best of themselves on the work floor. But our top priority? Making sure that your employees are protected against the risks they come into contact with every day and can safely fulfill their day job.

For every job, we design work clothing that offers the protection and meets the functional requirements of the job. Electrostatic, fluorescent or protective against chemical hazards, the dangers of welding, extreme cold or wet weather? Thanks to our in-depth expertise, we know perfectly which requirements and standards your clothing must meet so that your company has maximum scope for business.

Your personnel deserves protection, but your product and/or production process places demands on safety. Count on Van Moer. Our knowledge is focused and we like to think in solutions. Companies from various sectors: metal industry, chemical industry, road worker are already appealing to us for many years to protect their employees during the performance of the day activity.

Healthcare

We are proud to have more than 25 years of experience in producing corporate clothing & textiles for the healthcare sector. We provide the perfect concept tailored for hospitals, operating rooms and healthcare facilities. Count on the best materials and consistent quality, with an eye for the functional requirements of the work, the highest hygiene standards and the look & feel our customer wants to convey.

Both the care, medical, logistics staff, and the maintenance and kitchen employees all put their heart and soul into helping anyone in need every day. Our experts combine their many years of experience in product development and broad knowledge of materials to make these employees shine with pride in their outfits.

From ample pockets in a nursing uniform and clean-air suits that comply with EN 13795. From the WIP guidelines to a well-considered emphasis on a uniform that contributes to the warm atmosphere of a healthcare facility: our functional, comfortable & fashionable clothing package quickly makes it clear that it meets all customer requirements while also enhancing the visual identity of your healthcare facility.

Cleanroom

Van Moer designs workwear for employees who work daily in a very clean and controlled work environment. Think of laboratories and clean rooms in pharmaceutical or electronics companies.

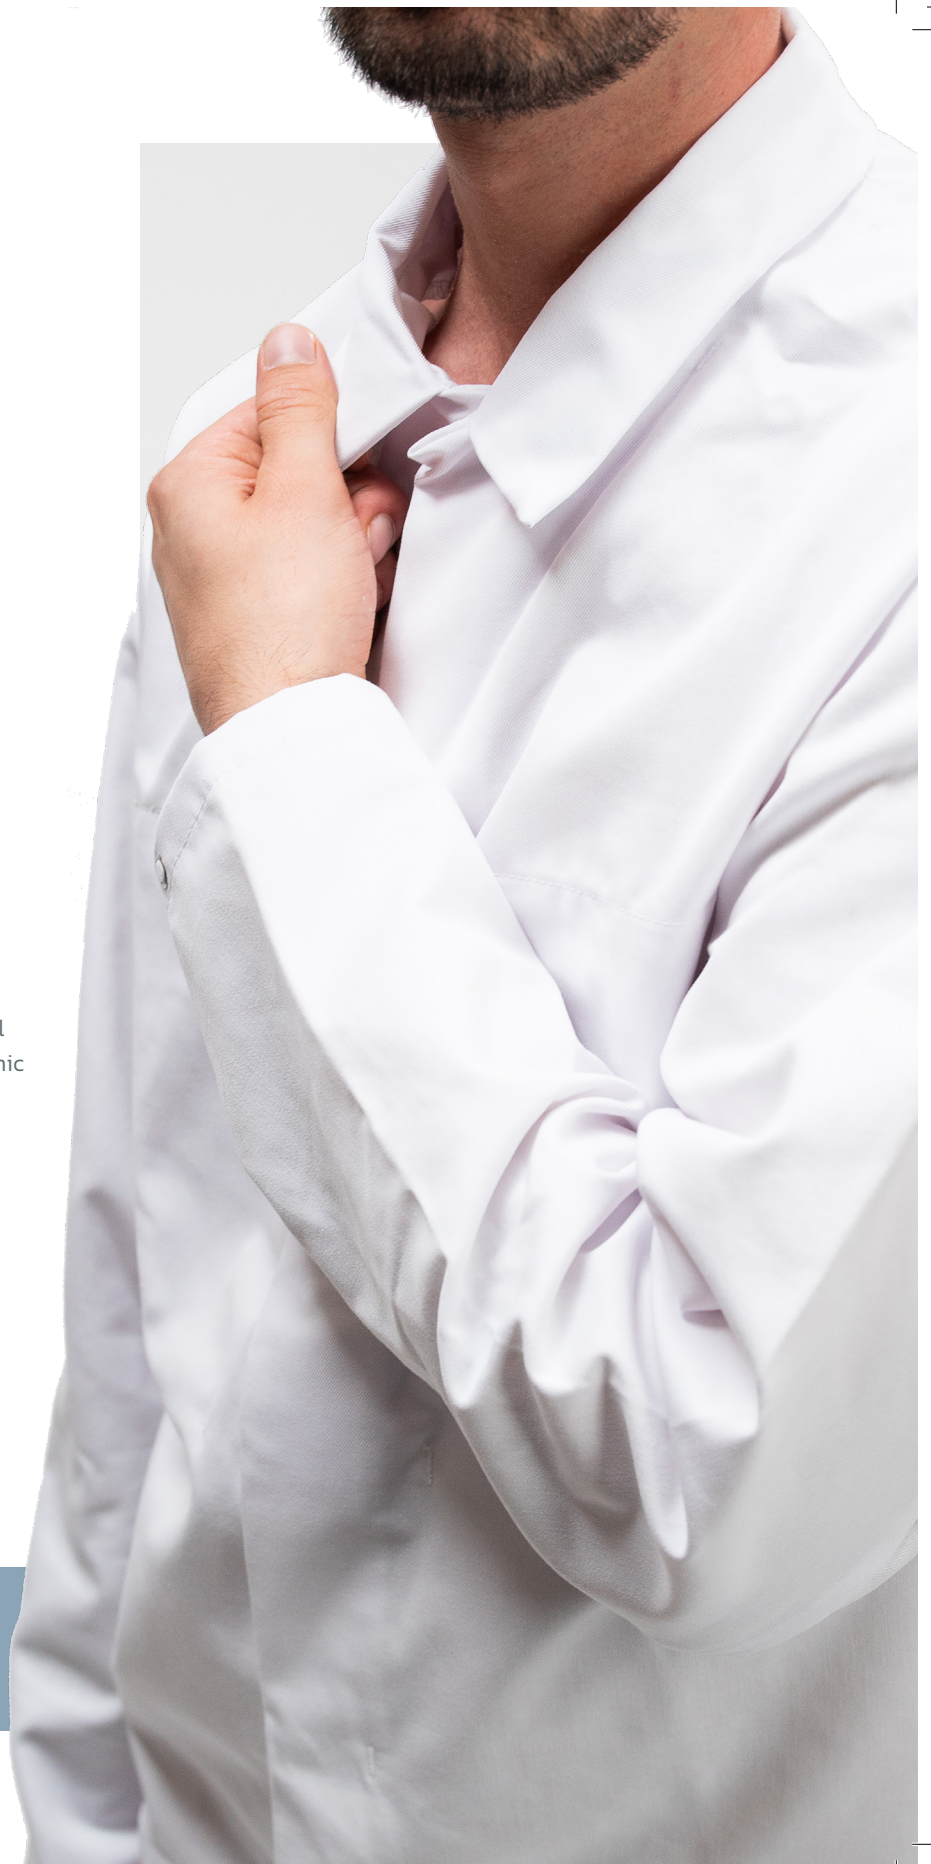

Thanks to our many years of experience with various requirements, we develop customized industrial clothing. Complete with your specific requirements for sterilizability, antibacterial properties, requirements for electrostatic discharge, pore size and freedom of movement.

Comfort and safety serve as the basis. In addition, our exclusive designs - inspired by your technical and functional requirements - give your company or organization a completely individual look and feel.

Food

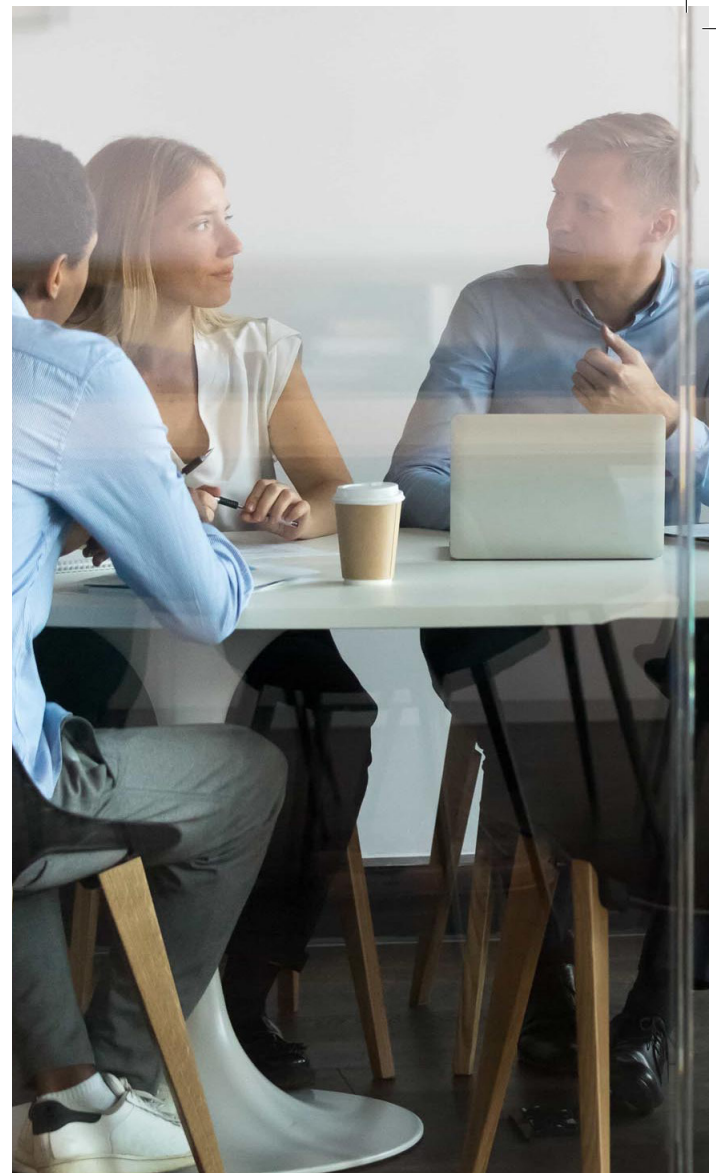

For the food industry, both for the preparation and processing of (non-)perishable foods, Van Moer creates and has various collections in its range. We dispose of different fabrics and fabric qualities with which we offer the food sector a tailor-made solution.

Our clothing packages are designed to meet to the requirements of the DIN 10425 standard. We are mindful to the hygiene requirements and thus push your hygienic business operations to new heights. With our work and industrial clothing for the food industry that complies with HACCP regulations, we focus on the safest and healthiest working conditions for your employees in a food production environment.

Our thoughtful way of approach

Thanks to a clear and structured step-by-step plan, we provide your company with comfortable and durable workwear. In doing so, we pay attention at every step of the process to the right balance between your wishes and the most sustainable way to realize them.

Thorough discussion

- 01** Everything starts with a nice conversation in which we get to know each other better. We sit around the table together to go over your wishes and we analyze the functional requirements that the clothing package for your company or organization must meet. After all, the corporate clothing of employees in a health care institution requires a different functionality and atmosphere than that of an employee in the construction industry. What remains constant? Our focus on the necessary quality and the desired appearance. From here we outline a number of clothing proposals and get to work!

Presentation drawings

02 To work purposefully, we put together a needs analysis. This forms a solid basis for the development of presentation drawings and the development of trial models in our manufacturing workshop. We work thoughtfully so that these colored drawings – at a glance – paint a complete picture of our designs. Need some adjustments? On the basis of your feedback, we refine our proposals!

Trial models & prototypes

03 Satisfied with the presentation drawings? Choice made in terms of fit, design and materials? Then we work out pilot models and prototypes in our production house. For the production we use the same fabrics, yarns and haberdashery as for later production. This way you always know how your chosen clothing will look and feel looks and feels in real life.

Test phase

04 Van Moer thinks service-oriented and can quickly shift with an impact on your business. How do we do that concretely? By organizing a test period with test models. A number of trial persons get the chance to wear the designed clothing for a certain period of time and test it for wearing comfort and wear. On the basis of your feedback and according to your approval, adjustments are made in-house, improvements and a wash test take place. Thanks to this hands-on mentality we are 100% sure that the clothing meets your expectations and is comfortable to wear at the workplace.

Production and delivery

05 Once we are both satisfied with the prototypes and samples, your corporate clothing goes into production. Van Moer makes itself unique in customization. For us it means starting with the purchase of the highest quality fabrics and haberdashery that offer a real added value for your company. To achieve that, we exclusively work together with reputable suppliers who are known for their quality. We keep the purchase of raw materials and production close to home home, for an optimal customer journey!

Local garment workshops

In Tunisia, Slovakia, Kosovo and Pakistan work local garment workshops like our Van Moer colleagues. They are responsible for the production of clothing collections that correspond to their sector-specific expertise. The total picture: a combination of customer-specific service, a personal approach, transparent communication and a lot of flexibility.

We have had strong relationships with these garment workshops. At Van Moer we attach great value to build longterm partnerships with our garment ateliers. We are fully committed to regular consultation moments and working visits. This way the high expectations of our customers and we deliver a finished garment tailored to the customer's his wishes!

Sustainability

By being close to the (end) customer from the start transparent communication experience, we manage a sound advisory advisory process. And that helps us achieve everyone's socially responsible goals. We translate our most important sustainability pillars step by step towards a better world for people, the environment and business operations.

So thanks to close and long-term partnerships with laundry, customer and suppliers, we have been reducing our impact on the environment and society for years. As a member of BSCI (Business Social Compliance Initiative), Van Moer is fully committed to better working conditions worldwide together with its garment workshops.

Raw materials

01 Everything starts with a thorough selection of high-qualityworthy raw materials from our European suppliers, which meets strict standards and European legislation. Certified durable materials with a long service life are the result of testing procedures in our lab. No harmful chemicals or environmentally unfriendly production methods, but sustainable recycling of worn clothing.

With an LCA (Life Cycle Analysis) we assess the environmental impact of our products throughout their life cycle. Ökotex, Reach, Ökotex-Step set high standards for social and environmental issues in the textile sector: essential in today's sustainable era.

De vijf stappen naar succes in duurzaamheid

Thanks to close and long-term partnerships with laundry, customer and suppliers, we have also been reducing our impact on the environment and society for years. As a member of BSCI (Business Social Compliance Initiative) Van Moer, together with the workshops, is fully committed to better working conditions worldwide. Sustainability is both our standard and an ongoing process that we improve time and again. Just ask our CSR manager.

Design

02 Our successful end-of-life solution evolves from a blank canvas to a future-proof design based on your parameters. Our experts create a functional, industrially washable and timeless design with the highest wearing comfort. Consciously, we translate your corporate identity into a sustainable design that is budget-friendly, environmentally friendly, and suitable for challenging working conditions. Proudly we comply with various European standards from ISO 9001 to ISO 14001.

Productie

03 Respect, cooperation and partnership are key during every process at Van Moer. As a member of BSCI (Business Social Compliance Initiative) Van Moer is committed, together with the workshops, to better working conditions worldwide. The fact that we have been cooperating for more than 30 years with our production sites in Eastern Europe and North Africa is the best proof of that today. Van Moer is always looking for ways to reduce the impact of our products on the environment. No remaining stocks and overproduction, but the right quantity thanks to our production on order. Based on the wishes of the customer.

Transport

04 We achieve impactful sustainable production on the one hand through our long-term, transparent and fair cooperation with production sites. Anderly, we keep the procurement of raw materials and production close to home in order to reduce transport costs. With efficient coordination of our production processes, we also optimize our transport costs. Minimum packaging and collected shipments, maximum utilization of the cargo space! This way we are on the right track together.

Reuse

05 Investing in methods for the reuse of depreciated, circular canvases is investing in the future. After long and intensive use, we like to discover opportunities to give clothing and materials such as PET bottles a new life. Looking for even more new ecological facets of reuse, we try to recycle our discarded clothing and our company waste to the maximum recycling. Greening the entire process towards the endproduct? Van Moer has connections and experience in surplus.
