

**SUSTAINABLY
DRESSING CARE**

CARING FOR PEOPLE AND PLANET

Customised design

We translate the customer's wishes into an overall concept in which functionality and comfort blend seamlessly with the identity and corporate style of the healthcare institution.

Redesign

The same familiar look, with improved functionality and wearing comfort. This lets you switch to a renewed range sustainably and in phases.

Sustainable design

Every design is developed to remain in its first life cycle for as long as possible. Every step is documented and traceable down to the smallest detail.

Sustainable in the OR

For a more sustainable operating room, you can also switch to reusable clothing with us – such as our washable thermal jackets and surgical caps, made in trusted Van Moer quality.

Sustainably dressing care, caring for people and planet

Sustainable design, raw materials and production.

Circular vision

Future-proof design

Long-term quality
